Ayach Youssef

COMPUTER ENGINEERING STUDENT · SOFTWARE DEVELOPMENT ENTHUSIAST

ayach.you.fst@uhp.ac.ma · +212 698 869 977 · Berrechid, Morocco · github.com/ayachyoussef
linkedin.com/in/ayachyoussef

EDUCATION

Licence ST – Computer Engineering (LSGI)
FST Settat, Morocco
2025 – Present

DEUST – Mathematics, CS & Physics (MIP)
FST Settat, Morocco
2023 – 2025

Baccalaureate – Science Track
Morocco
Mention: Good

SKILLS

Languages

C · Java · Python · JavaScript · PHP · SQL · PL/SQL · Bash

Web

HTML · CSS · React · Node.js · PHP

Databases

SQL · PL/SQL · Oracle

Tools

Docker · Linux · Git · VS Code · Eclipse · Cisco PT

LANGUAGES

Arabic	Native
French	Fluent
English	Intermediate

INTERESTS

Software Dev · System Design · Networking · Automation · Open Source

PROFILE

Computer Engineering student at FST Settat, Morocco, with strong foundations in mathematics, algorithms, and software development. Passionate about building practical software solutions through automation, web technologies, and system design. Seeking internship and collaborative opportunities to apply and grow my skills across the full stack.

RELEVANT COURSEWORK

Licence ST – Computer Engineering

2025 – Present

- Advanced Databases (SQL / PL-SQL), Web Development, OOP in Java
- Computer Networks, Operating Systems, System Administration
- UML and Software Engineering

DEUST – Mathematics, CS & Physics

2023 – 2025

- Data Structures in C, Algorithms, Programming in C
- Probability & Statistics, Numerical Analysis
- Electromagnetism, Electronics, Thermodynamics

PROJECTS

Motorola 6809 Processor Simulator

- Developed a simulator reproducing the Motorola 6809 CPU architecture behavior.
- Implemented instruction fetch, decode, and execution pipeline in Python.

Python | Computer Architecture

Linux Server Administration Lab

- Configured Ubuntu virtual machines for server administration tasks.
- Managed users, permissions, services, and system monitoring via Bash scripting.

Linux | Bash | Virtual Machines

Advanced Database Management System

- Designed relational databases with stored procedures, triggers, and query optimization.
- Deployed Oracle SQL Developer inside Docker containerized environments.

SQL | PL/SQL | Oracle | Docker

Computer Networking Simulation

- Designed and simulated networks with VLAN, inter-VLAN routing, DNS, and DHCP.
- Configured routers and switches in Cisco Packet Tracer environments.

Cisco Packet Tracer | VLAN | DNS/DHCP

Web Development Projects

- Built dynamic web applications with responsive design and server-side logic.
- Integrated front-end components with back-end PHP APIs and databases.

HTML | CSS | JavaScript | PHP | React

SYSTEMS & NETWORKING

Linux / Ubuntu | Process Management | DNS / DHCP | VLAN / WAN / MAN | Router & Switch Config | Threads & Processes | System Administration
